Software Engineer

Summary

I'm a software engineer with a strong background in full-stack development and a passion for building clean, efficient, and user-friendly web applications. I enjoy working with modern technologies and frameworks to turn ideas into functional solutions that make an impact. I'm also interested in the Internet of Things (IoT) and embedded systems, often tinkering with Raspberry Pi, Home Assistant, and smart home automation projects. I'm always eager to learn, expand my skills, and collaborate with others to create software that's both practical and well-designed.

Professional Experiences

- **Dispatcher/Manager** – Safeway Meditrans LLC, Austin, TX **Mar 2019 – June 2026**
Dispatching, medical billing, financial management, and overall business operations. Key responsibilities include coordinating schedules, managing billing processes, monitoring financial performance, developing operational policies, and ensuring high customer satisfaction.
- **Dispatcher** – Rejha Group, Albany, NY **Aug 2017 – Feb 2019**
